

EDITORIAL

Dear Readers,

The present RPD edition brings the valuable contribution of the Dossier organized by Professor Julyerme Matheus Tonin, from Economy Department of Universidade Estadual de Maringá (UEM). Besides the teaching practice and solid background, including a doctorate from ESALQ/USP, the Professor has a broad scientific production, with emphasis on agricultural economy and national economic conjuncture follow up. Parallely, he actively participates in several research and university extension networks.

This experience and curriculum are reproduced in the elaborated dossier, which brings analysis proposals from several researchers, focused on current themes and of undoubted pertinence to the Brazilian regional matter and in special to that of Paraná.

We wish you all a good reading.

Daniel Nojima

Editor of the Revista Paranaense de Desenvolvimento
